

Publications Internationales du Professeur OURBIH Megdouda

1. Oualid Saci and **Megdouda Ourbih-Tari**. Refined descriptive sample inference in the estimation of the cumulative distribution function. International Journal of Mathematics in Operational Research. DOI: 10.1504/IJMOR.2020.10030840. Paper in Press. 2020.
2. Siham Kebaili, **Megdouda Ourbih-Tari**, Sofia Guebli and Abdelouhab Aloui. Adaptive refined descriptive sampling algorithm for dependent variables using Iman and Conover method in Monte Carlo simulation. Communications in Statistics: Theory and Methods. Published online 14/01/2020.
<https://doi.org/10.1080/03610926.2019.1709645>
3. Linda Khalfi and **Megdouda Ourbih-Tari**. Stochastic risk analysis in Monte Carlo Simulation: A case study. Communications in Statistics: Simulation and Computation. Published online 10/02/2019.
<https://doi.org/10.1080/03610918.2018.1532514>
4. Kahina Ouadhi and **Megdouda Ourbih-Tari**. (2019). Monte Carlo simulation of ordinary least squares estimator through linear regression adaptive refined descriptive sampling algorithm. Communications in Statistics: Theory and Methods. 48 (4), 865-875.
<https://doi.org/10.1080/03610926.2017.1419265>
5. Hafida Saggou, Ines Sadeg, **Megdouda Ourbih-Tari** and El-Bay Bourennane. (2019). The analysis of unreliable M[X]/G/1 queueing system with loss, vacation and two delays of verification. Communications in Statistics: Simulation and Computation. 48(5), 1366-1381. <https://doi.org/10.1080/03610918.2017.1414245>
6. Imane Terfas, Hafida Saggou and **Megdouda Ourbih-Tari**. (2019). Transient study of a queueing system with one unreliable server, batch arrivals, two types of verification, loss and vacation. Communications in Statistics: Theory and Methods. 48 (10), 2580-260. <https://doi.org/10.1080/03610926.2018.1472780>
7. Meriem Boubalou, **Megdouda Ourbih-Tari**, Abdelouhab Aloui and Arezki Zioui. (2019). Comparing M/G/1 queue estimators in Monte Carlo simulation

through the tested generator “getRDS” and the proposed “getLHS” using variance reduction, Monte Carlo Methods and Applications. 25(2), 177-186.

8. **Megdouda Ourbih-Tari**, Sofia Guebli and Abdelouhab Aloui. (2019). Applying Refined Descriptive Sampling on the vibrating string model. International Journal of computing science and mathematics. (3), 276-287. <http://www.inderscience.com/info/ingeneral/forthcoming.php?jcode=ijcsm>
9. Kenza Tamiti, **Megdouda Ourbih-Tari**, Abdelouhab Aloui and Khelidja Idjis. (2018). The use of variance reduction, relative error and bias in testing the performance of M/G/1 retrial queues estimators in Monte Carlo simulation. Monte Carlo Methods and Applications. 24(3) 165–178.
10. Nassim Brahimi, Abdellah Salhi and **Megdouda Ourbih-Tari**. (2018) Convergence analysis of the plant propagation algorithm for continuous global optimization. RAIRO Oper. Res. 52(2) 429-438.
11. Nassim Brahimi, Abdellah Salhi and **Megdouda Ourbih-Tari**. (2017). Drift analysis of ant colony optimization of stochastic linear pseudo-boolean functions. Operations Research Letters. 2017. 45(4) 342-347. <http://www.sciencedirect.com/science/article/pii/S0167637717302730>
12. Hafida Saggou, Tassadit Lachemot and **Megdouda Ourbih-Tari**. (2017). Performance measures of M/G/1 retrial queues with recurrent customers, breakdowns and general delays. Communications in Statistics: Theory and Methods. 46(16) 7998-8015. <http://www.tandfonline.com/doi/full/10.1080/03610926.2016.1171352>
13. Khelidja Idjis, **Megdouda Ourbih-Tari** and Latifa Baghdali-Ourbih. (2017). Variance reduction in M/M/1 retrial queues using refined descriptive sampling. Communications in Statistics: Simulation and Computation. 46(6) 5002-5020. <http://tandfonline.com/doi/full/10.1080/03610918.2016.1140778>
14. **Megdouda Ourbih-Tari** and Mahdia Azzal. (2017). Survival function estimation with nonparametric adaptive refined descriptive sampling algorithm: A case study. Communications in Statistics: Theory and Methods. 46(12) 5840-5850. <http://tandfonline.com/doi/full/10.1080/03610926.2015.1065328>

15. **Megdouda Ourbih-Tari**, Arezki Zioui and Abdelouhab Aloui. (2017). Variance Reduction in the simulation of a stationary M/G/1 queuing system using Refined Descriptive Sampling. Communications in Statistics: Simulation and Computation. 46(5) 3504-3515.
<http://tandfonline.com/doi/full/10.1080/03610918.2015.1096374>
16. Latifa Baghdali-Ourbih, **Megdouda Ourbih-Tari** and Abdelnasser Dahmani. (2017). Implementing Refined Descriptive Sampling into Three Phase Discrete-Event Simulation Models. Communications in Statistics: Simulation and Computation. Taylor and Francis. 46(5) 4035-4049.
<http://www.tandfonline.com/doi/full/10.1080/03610918.2015.1085557>
17. Leila Baiche and **Megdouda Ourbih-Tari**. (2017). Large sample variance of simulation using refined descriptive sampling: Case of independent variables. Communications in Statistics: Theory and Methods. 46(1) 510-519.
<http://tandfonline.com/doi/full/10.1080/03610926.2014.997362>
18. Samra Boulfkhar, Assia Arab, Djamil Aissani and **Megdouda Ourbih**. (2016). MAC Protocol Design Based on Satellites Presence for Low-Energy Wireless Sensor Networks. Wireless Personal Communications. Springer. 86(3) 1299–1319. <https://link.springer.com/article/10.1007/s11277-015-2989-7>
19. Linda Khalfi and **Megdouda Ourbih-Tari**. (2015). Comparing Refined Descriptive Sampling with Quasi Monte Carlo methods. Management Review: An International Journal. 10(2) 57-74.
20. Abdelouhab Aloui, Arezki Zioui, **Megdouda Ourbih-Tari** and Amine Alioui. (2015). A general purpose module using refined descriptive sampling for installation in simulation systems. Computational Statistics. 30 (2) 477-490.
<http://link.springer.com/article/10.1007/s00180-014-0545-7>
21. **Megdouda Ourbih-Tari** and Sofia Guebli. (2015). A comparison of methods for selecting values of simulation input variables. ESAIM: Probability and Statistics. 19, 135-147.
22. Latifa Ourbih-Baghdali, **Megdouda Ourbih-Tari** and Abdelnasser Dahmani. (2013). A pseudo random number generator under Windows using Refined Descriptive Sampling. Computer Technology and Application 4(2) 85-92.
